

ITINERARY B5 | 5 DAYS / 4 NIGHTS
Friday to Tuesday

ROUTE

This itinerary packs some of the Galapagos Island's best sites into five days, giving a good overview of the the southern part of the archipelago. Champion Islet and Bartolomé are two of the most popular snorkelling sites, where you can swim with fishing penguins, sea lions and turtles. The birdlife on this route is abundant, as you'll get to spot albatrosses, booby colonies, flamingos, flightless cormorants and much more. Other sites include Gardner Bay, Suarez Point, Cormorant Point, Champion Islet and Post Office Bay.

HIGH CHANCE OF SPOTTING:

DAY 1 - FRIDAY

AM – Arrival at San Cristobal Airport

Upon arrival at San Cristobal Airport, a check-up is carried out first, to ensure that no foreign plant or animal species are introduced on the islands. Furthermore, your TCC (Transit Control Card) is stamped; this must be kept safe during your trip, as it has to be presented again on your return flight. In addition, entrance to the Galapagos National Park is due for entry (US \$ 100), if this has not yet been paid. Your guide will meet you at the airport, assist you with the luggage and accompany you on the short bus ride. Here you will climb aboard the yacht Solaris. After greeting the crew and the captain, your cabins will be assigned to you and then you will enjoy your first lunch on-board.

PM - Interpretation Centre (San Cristóbal)

After saying goodbye to Route B4 passengers, we head to the Interpretation Centre, close to the provincial capital Puerto Baquerizo Moreno. Information panels in English and Spanish, pictures, models and diagrams conveying the origin of the Galapagos can be found. The detailed exhibition also provides insights about the volcanic formation of the archipelago, its remoteness from the mainland, its marine currents, its particular climate, the arrival of different species and their spread, and more.

DAY 2 - SATURDAY

AM - Gardner Bay (Española)

On the north-eastern coast of the island of Española, Gardner Bay offers a wonderful place to refresh in the turquoise sea and to admire the large number of colourful reef fish. You will also have the opportunity to snorkel side by side with green sea turtles, or to enjoy the proximity of the playful Galapagos sea lion. The white sand beach is also an important breeding ground for the green sea turtles. In the crystal-clear ocean, sometimes whales can be sighted under certain circumstances.

PM - Suarez Point (Española)

This rocky area is home to the most impressive and diverse seabirds of the archipelago. The endangered Galapagos albatross returns to Española (March - December) annually. This allows visitors to admire the balances of pipes and bows (especially in October). Blue-fronted and nazcat oil pipes, black-tailed gulls and red-billed tropic birds are native to this island. Along the southern coast, high cliffs allow spectacular views of ascending birds and the sea water shot through air holes.

DAY 3 – SUNDAY

AM – Punta Cormorant & Champion Islet (Floreana)

The peninsula of Cormorant Point forms the extreme north cape of Floreana, which was formed by a number of smaller volcanic cones, covered with tropical dry forest (palo santo). At the landing beach, you will be welcomed by a small Galapagos sea lion-colony. The green sand on this beach contains a high percentage of glassy olivine crystals that have been blown out by the surrounding tuff cones. The ‘flour sand’ beach on the southern side of the peninsula is made up of even finer white coral sand that feels very smooth on your feet. Parrotfish have pulverised it, grinding the calcareous skeletons of living coral. You can spot schools of stingrays who love burying themselves in the sandy bottom. During the first months of the year, Pacific green turtles come ashore to bury their eggs.

This viewpoint was the favourite spot of one of Floreana’s first colonists, the eccentric Baroness and self-proclaimed ‘Empress of Galapagos’ Eloisa von Wagner Bosquet, who even built her house a few metres behind. She and one of her lovers were the first in a series of mysterious disappearings and deaths in the 1930s.

PM – Post Office Bay (Floreana)

While having lunch we will navigate back to Post Office Bay (about 1hr). Post your holiday greetings in the historical barrel, one of three nearby visitor’s sites on Floreana’s north coast (short displacement, wet landing) and relax. Besides Galapagos sea lions, Pacific green turtles and golden cownose rays you might spot Galapagos penguins! This is the only place in the south-eastern archipelago where penguins reside. Explore by inflatable dinghy – or in your own pace by sea-kayak – another submerged crater rim around the bay of Baroness Lookout. Climb the miniature basaltic cone of Baroness Lookout and take in the paradisiacal coastal views.

DAY 4 – MONDAY

AM – Sullivan Bay (Santiago)

The arrival in Sullivan Bay is like a moon landing. The desolate, sprawling fields seem to be mostly lifeless, but this island, which is particularly popular among photographers, still offers a lot to see. There is even some life! Green sea turtles burrow in the small white sand beach, where you can also find crabs, blue herons and oystercatchers.

PM – Bartolomé

The island of Bartolomé rises 114m above Sullivan Bay. Climb the steps of the Bartolomé Peak Trail and you will be rewarded with panoramic views over volcanic peaks, lunar craters and lava fields. Afterwards you can refresh yourself at the foot of the famous ‘Pinnacle Rock’ and explore the underwater world in the shallow water while snorkelling.

Although there is little vegetation on this island, it has two breathtaking beaches, where sea turtles live. At the foot of the mountain you can also discover a small colony of Galapagos penguins.

DAY 5 - TUESDAY

AM - Black Turtle Cove (Santa Cruz)

This small bay is located on the north side of the island of Santa Cruz and offers a unique backdrop for unique adventures. The landscape makes you feel as if you're in the Amazon rainforest rather than near the sea. Explore the quiet emerald lagoon and surrounding shallow bays with the inflatable dinghy. The crystal clear water allows you to spot groups of whitetip reef sharks, blacktip reef sharks, hammerhead sharks, gold rays and spotted eagle rays.

- Transfer to Baltra Airport
